

**Table 3. Final nonroad diesel emissions standards**

<b>Rated engine power</b>	<b>First year of standards or phase-in period</b>	<b>Particulate matter (grams per horsepower per hour)</b>	<b>Nitrogen oxides (grams per horsepower per hour)</b>
Less than 25 horsepower	2008	0.30	—
25 to less than 75 horsepower	2013	0.02	3.5
75 to less than 175 horsepower	2012-2013	0.01	0.30
175 to less than 750 horsepower	2011-2013	0.01	0.30
750 horsepower or more	2011-2014	0.075	2.6 and 0.50
	2015	0.02 and 0.03	0.50

*Note: Where a range of years is provided, 40 CFR 1039.102 prescribes a gradual phase-in whereby a cumulative percentage of total engines for a manufacturer must comply each year prior to the final year.*

U. S. Environmental Protection Agency, Clean Air Nonroad Diesel Rule, Exhaust Emission Standards, EPA- 420- F- 04- 032 (Washington, DC, May 2004), web site [www.epa.gov/nonroad-diesel/2004fr/420f04032.htm](http://www.epa.gov/nonroad-diesel/2004fr/420f04032.htm). Notes: For rated engine power 25 to less than 75 horsepower, the 3.5 standard includes both NOx and nonmethane hydrocarbons. For rated engine power 750 horsepower or more, the 5.0 standard for NOx applies to generator sets over 1,200 horsepower. For all generator sets, the 0.02 standard for particulate matter applies to generator sets, and the 0.03 standard applies to other engines; the 0.50 standard for NOx applies to generator sets only.
